JODI ABRAHAMS

Front-end Developer | Vue.js, JavaScript, React & TypeScript

Cape Town, South Africa | 078 209 6121 | jodiabrahams9@gmail.com | Portfolio | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Front-end Developer with 5+ years of hands-on experience and 2+ years of professional experience building responsive, production-ready web and mobile applications. Strong in HTML5, CSS3, JavaScript (ES2017+), TypeScript, Vue.js, React, Next.js, Node.js, npm, RESTful APIs, and component-driven UI development. Experienced creating polished interactive interfaces with GSAP, Framer Motion, and React Three Fiber/Three.js, while testing, debugging, and improving frontend performance and usability. I take ownership of work from requirements through release, collaborate effectively across design and engineering, and adapt quickly to new tools and workflows. I bring the technical foundation, reliability, and product mindset to contribute from day one and grow into greater responsibility.

TECHNICAL SKILLS

Core Frontend	Vue.js, JavaScript (ES2017+), TypeScript, React, Next.js, React Native, HTML5, CSS3, Tailwind CSS, responsive/mobile-first UI
Backend & APIs	Node.js, npm workflows, RESTful APIs, Prisma, PostgreSQL, MySQL, Appwrite
Testing & Quality	Vitest, Jest, Testing Library, Cypress basics, Postman, unit testing, debugging, manual QA, web performance
Build & Collaboration	Git, GitHub, branch/PR workflows, Vite, CI/CD basics, Vercel, Docker basics, Sentry, Agile/Scrum, documentation
Interactive UI & Product Workflows	GSAP, Framer Motion, React Three Fiber/Three.js, JavaScript animations, responsive landing pages, Figma-to-code, reusable components, TipTap/ProseMirror, PDF/export flows

WORK EXPERIENCE

Freelance Front-end / Full Stack Developer | Independent Projects | Remote | Jan 2020 - Present (Full-time since Apr 2026)

- Own end-to-end delivery of responsive websites and web applications using JavaScript/TypeScript, React, Next.js, HTML5, CSS3, and Tailwind CSS for independent products and client-facing work.
- Turn Figma designs and product requirements into polished, reusable, mobile-first interfaces with clear component structure and consistent responsive behaviour across devices.
- Build and integrate RESTful APIs, authentication, payments, real-time data, and relational backends; validate frontend/backend behaviour with Postman and automated tests.
- Take ownership of npm-based development workflows, Git/GitHub version control, deployments, debugging, and production fixes from implementation through release.

Contract Full Stack Developer | Transhumanity | Remote | Nov 2025 - Apr 2026

- Delivered production frontend work across a SaaS reporting platform, building and maintaining responsive workflows for the report editor, report manager, exports, map snapshots, and content library.
- Owned improvements to complex rich-text editor behaviour, including toolbar state, selection persistence, undo/redo history, editor preferences, page-count indicators, markdown support, and report editing UX.
- Shipped report-management features including folder/report cards, report counts, navigation fixes, metadata handling, and trash/archive workflows.
- Raised PDF and report-export quality by resolving cover-preview, page-spacing, generated-text, and map/chart snapshot issues across production workflows.
- Strengthened frontend reliability with automated tests for editor and report-manager flows while debugging complex UI state and integration behaviour.
- Moved feature and bug-fix work from implementation through GitHub review to merge, responding to reviewer feedback, rebasing branches, and resolving conflicts cleanly.

Full Stack Developer | **Crunchtime Deliveries** | Remote | Jun 2024 - Jun 2025

- Delivered responsive web and mobile interfaces using React, Next.js, JavaScript/TypeScript, and React Native for a SaaS-style delivery platform.
- Built real-time tracking, secure payment integration, and multi-role user workflows for customers, drivers, and administrators.
- Connected frontend features to backend services and APIs while supporting production rollouts under tight delivery deadlines.
- Worked closely with designers and backend developers to turn requirements into reusable, responsive, cross-device UI components.
- Improved frontend performance, component reuse, maintainability, and responsive behaviour across web and mobile experiences.

Web Developer Intern | **Life Choices Studio** | Cape Town | Apr 2024 - Jun 2024

- Developed a responsive WordPress e-commerce template using HTML/CSS-based web workflows and SEO-optimized imagery for a retail client.
- Translated design requirements into responsive layouts and improved page performance by reducing image-load impact.
- Acted as Scrum Master by facilitating stand-ups and sprint reviews while coordinating work across the project team.

ADDITIONAL EXPERIENCE

Support Engineer | **Securicom** | Cape Town | Feb 2022 - Mar 2023

- Provided first-line technical support to enterprise clients via phone, email, and remote sessions, diagnosing software, network, and email-security issues.
- Logged, tracked, prioritized, and resolved support tickets within SLA timeframes while maintaining clear technical documentation.
- Collaborated with developers, system administrators, and internal teams to investigate recurring issues and document practical solutions.
- Communicated technical fixes clearly to technical and non-technical users while managing urgent cases under pressure.

Junior Network Technician (Volunteer) | **Cape Peninsula University of Technology** | Cape Town | Dec 2017 - Jan 2019

- Supported physical network setups including routers, switches, and access points across campus buildings.
- Resolved basic connectivity and LAN configuration issues while assisting network engineers during infrastructure upgrades.

SELECTED PROJECTS

OpsFlow | Next.js, TypeScript, Prisma, PostgreSQL, Tailwind CSS, TipTap, Vitest, Vercel

- Built a production-style SaaS operations workspace with authentication, role-based workflows, responsive dashboards, rich-text report editing, PDF export, automated tests, and deployment documentation.

FuelWise SA | React, TypeScript, Vite, Supabase, REST APIs, Vitest, Vercel

- Built and deployed a responsive South African fuel-cost platform with interactive calculators, API-backed data, authentication, saved account workflows, automated tests, and production-ready release tooling.

Cocktail Animation Website | React, JavaScript, GSAP, Vite, Tailwind CSS

- Built a responsive interactive landing experience using GSAP, SplitText, parallax effects, scroll-triggered animations, and a custom carousel, with a focus on animation timing, usability, and frontend performance.

EDUCATION

Full Stack Web Development | Life Choices Coding Academy | 2023 - Mar 2024

A+ Certification | Pearson VUE Testing Centre | May 2023

Information and Communication Technology | Cape Peninsula University of Technology (Incomplete) | Jan 2017

Matric Certificate | De Kuilen High School | Jan 2016

LANGUAGES

English: Native | Afrikaans: Basic to intermediate
