PROFESSIONAL SUMMARY

Full-stack software developer building responsive interfaces, SaaS workflows and API-driven applications with React, Next.js, TypeScript, JavaScript, Node.js and PostgreSQL. My experience spans authentication, payment integrations, real-time features, debugging, automated testing and deployment. I take work from requirements through implementation and review, with attention to maintainability and the people using the product. I also develop AI-powered application prototypes and use Claude and Codex as development tools, checking generated changes through code review and testing.

TECHNICAL SKILLS

Frontend: React, Next.js, JavaScript, TypeScript, Vue.js, HTML5, CSS3, Tailwind CSS; React Native; responsive interfaces and reusable components.

Backend & data: Node.js, REST APIs, PostgreSQL, Prisma, MySQL, Supabase, Appwrite; authentication and API integration. Python exposure.

Quality & delivery: Vitest, Jest, Testing Library, Postman, debugging, Git/GitHub, pull requests, npm, Vite, Vercel; Docker and CI/CD basics.

Product & AI workflow: Figma-to-code, TipTap/ProseMirror, PDF exports; GSAP, Framer Motion, React Three Fiber/Three.js. Claude and Codex for AI-assisted development; structured model-output validation in application prototypes.

WORK EXPERIENCE

Freelance Full-Stack Software Developer

Independent / Remote | Apr 2026 - Present | Full-time

- Build and maintain independent web applications, translating product requirements into responsive interfaces, API integrations and relational data workflows.
- Manage implementation, testing, debugging, Git/GitHub review workflows and deployment. Earlier part-time freelance and independent development from Jan 2020 ran alongside employed roles.

Contract Full Stack Developer

TransHumanity / Remote | Nov 2025 - Apr 2026

- Delivered production SaaS reporting features across rich-text editing, report management, content libraries, map snapshots and PDF/export workflows.
- Resolved editor selection, toolbar state, undo/redo and export-layout issues. Added automated tests and took changes through pull-request review, rebasing and merge.

Full Stack Developer

Crunchtime Deliveries / Remote | Jun 2024 - Jun 2025

- Delivered responsive React, Next.js and React Native interfaces for a commercial SaaS delivery management platform.
- Built real-time tracking, payment integration and customer, driver and administrator workflows; connected interfaces to backend APIs and supported production rollouts.

JODI ABRAHAMS

Full-Stack Software Developer | Experience, projects & education

EARLIER EXPERIENCE

Web Developer Intern

Life Choices Studio / Cape Town | Apr 2024 - Jun 2024

- Developed a responsive WordPress e-commerce template, optimised imagery and translated designs into web layouts. Facilitated stand-ups and sprint reviews as Scrum Master.

Support Engineer

Securicom / Cape Town | Feb 2022 - Mar 2023

- Diagnosed software, network and email-security issues for enterprise clients. Managed support tickets, documented resolutions and collaborated on recurring technical problems.

Junior Network Technician (Volunteer)

Cape Peninsula University of Technology / Cape Town | Dec 2017 - Jan 2019

- Assisted with routers, switches, wireless access points and LAN troubleshooting, supporting network engineers during campus infrastructure upgrades.

SELECTED PROJECT EXPERIENCE

SaaS Delivery Management Platform

Commercial development at Crunchtime Deliveries

- Built web and mobile delivery workflows with React, Next.js, TypeScript/JavaScript and React Native, including payment integration, real-time tracking and role-based interfaces. This work forms part of the employment listed on page 1.

Possibility Engine

Independent engineering prototype | TypeScript, Next.js; structured AI workflows

- Developed an AI-assisted problem-solving application with modular interpretation, retrieval, generation and validation stages. Worked on structured outputs, citation/grounding checks, security controls and regression testing.
- Prototype limitations remain: passing structural checks does not establish practical usefulness. PostgreSQL persistence is not claimed as verified pending controlled-test confirmation.

FuelWise SA

Independent product | React, TypeScript, Vite, Supabase, REST APIs, Vitest

- Built and deployed a South African fuel-planning application with interactive calculators, account views, API-backed data, authentication and saved vehicle/calculation workflows.
- Implemented backend integrations and automated tests, with release tooling and deployment on Vercel.

OpsFlow

Independent portfolio project | Next.js, TypeScript, Prisma, PostgreSQL, Vitest

- Built a SaaS-style operations workspace with authentication, role-based workflows, dashboards, rich-text reports, PDF exports and automated tests.

EDUCATION & QUALIFICATIONS

Full Stack Web Development | Life Choices Coding Academy | 2023 - Mar 2024

A+ Certification | Pearson VUE Testing Centre | May 2023

Information and Communication Technology (Incomplete) | Cape Peninsula University of Technology | Jan 2017

Matric Certificate | De Kuilen High School | Jan 2016

LANGUAGES

English: Native | Afrikaans: Basic to intermediate
