PROFESSIONAL SUMMARY

Full-stack software developer with 2+ years of professional development experience and additional independent project experience. Build reliable web and SaaS applications using React, Next.js, TypeScript, Node.js, REST APIs and PostgreSQL. Delivered commercial reporting and delivery-platform functionality, including rich-text editing, PDF exports, real-time tracking and payment integrations. Experienced in debugging, automated testing, requirements-to-release delivery and AI-assisted engineering with Claude and Codex. Open to remote full-stack, frontend and software engineering opportunities.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, responsive UI, Figma

Backend & data: Node.js, REST APIs, PostgreSQL, Prisma, Supabase, authentication, role-based access

Quality & delivery: Git/GitHub, Vitest, Jest, regression testing, debugging, Postman, Vercel, PDF workflows

Additional: React Native, Expo, Vue.js; foundational Python, Docker and CI/CD; LLM integration via existing providers; Claude and Codex for assisted development

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Software Developer | Independent / Remote | Apr 2026 – Present

- Develop independent software products and web application solutions, from requirements and UI design through implementation, testing and deployment.
- Build React/Next.js interfaces, API-driven workflows, authentication and database integrations; apply test-driven investigation and AI-assisted development with manual verification.
- Current independent projects include FuelWise SA and Possibility Engine; prototypes and unverified integrations are identified as such.

Contract Full-Stack Developer | TransHumanity / Remote | Nov 2025 – Apr 2026

- Delivered production SaaS reporting features, including rich-text editing, report and content management, PDF export workflows and map snapshots.
- Investigated editor history/selection and cross-feature integration defects; improved export reliability and supported regression testing and GitHub-based reviews.

Full-Stack Developer | Crunchtime Deliveries / Remote | Jun 2024 – Jun 2025

- Built React, Next.js and React Native functionality across customer, driver and administrator delivery workflows.
- Contributed real-time order tracking, payments, responsive UI and production API integrations with design and backend collaborators.

Web Developer Intern | Life Choices Studio | Apr 2024 – Jun 2024

- Built responsive WordPress e-commerce templates, supported performance improvements and joined sprint planning and reviews.

ADDITIONAL EXPERIENCE

Support Engineer | Securicom | Feb 2022 – Mar 2023 — Enterprise technical support, incident troubleshooting, SLA-driven ticket handling and user communication.

Junior Network Technician (Volunteer) | CPUT | Dec 2017 – Jan 2019 — Campus network equipment setup and connectivity troubleshooting.

SELECTED PROJECTS

FuelWise SA | Full-stack fuel-cost planning platform

- Built vehicle-specific fuel estimates, budgeting workflows, spending insights and responsive dashboards; developed validation and anomaly checks for fuel-price monitoring. Automated publishing remains gated pending readiness.

AI Resume Analyzer | React · TypeScript · Puter.js · PDF.js · Zustand

- Integrated an existing AI provider to compare uploaded CVs against job descriptions and produce structured user feedback; implemented PDF handling, authentication and results workflows.

Possibility Engine (In Development) | Next.js · TypeScript · Prisma · PostgreSQL

- Building an AI-assisted problem-solving application with structured plans, constraint checks and separated provider/persistence modes. Offline regression and Windows browser validation completed; real PostgreSQL persistence remains unverified.

OpsFlow | Next.js · TypeScript · Prisma · PostgreSQL · Vitest

- Built a SaaS-style operations workspace featuring authentication, role-based workflows, dashboards, report editing and PDF exports.

EDUCATION & CERTIFICATION

Full Stack Web Development — Life Choices Coding Academy (2023–2024) | A+ Certification — Pearson VUE (2023)

Information and Communication Technology — CPUT (incomplete coursework) | Matric — De Kuilen High School
